VOLUME 24 CONTENTS

Vol. 24, No. 1

Special Issue: NUMERICAL SOLUTIONS OF FLUID PROBLEMS RELATED TO BUILDINGS, STRUCTURES AND THE ENVIRONMENT

E. H. Mathews	1	Editorial
S. Majumdar and **W. Rodi**	3	Three-dimensional computation of flow past cylindrical structures and model cooling towers
W. A. Schreüder and **J. Prieur du Plessis**	23	Simulation of air flow about a directly air cooled heat exchanger
S. C. Kot	33	Numerical modelling of contaminant dispersion around buildings
D. A. Paterson and **C. J. Apelt**	39	Simulation of wind flow around three-dimensional buildings
S. Murakami and **A. Mochida**	51	Three-dimensional numerical simulation of turbulent flow around buildings using the k–ϵ turbulence model
K. Häggkvist, U. Svensson and **R. Taesler**	65	Numerical simulations of pressure fields around buildings
H. B. Awbi	73	Application of computational fluid dynamics in room ventilation
S. Murakami and **S. Kato**	85	Numerical and experimental study on room airflow—3-D predictions using the k–ϵ turbulence model
J. A. Swaffield and **L. S. Galowin**	99	Multistorey building drainage network design—an application of computer based unsteady partially filled pipeflow analysis
Announcement	111	UPCAEDM '89

Vol. 24, No. 2

J. W. Axley	113	Multi-zone dispersal analysis by element assembly
M. H. Sherman	131	Analysis of errors associated with passive ventilation measurement techniques
A. S. Zohrabian, M. R. Mokhtarzadeh-Dehghan, A. J. Reynolds and **B. S. T. Marriott**	141	An experimental study of buoyancy-driven flow in a half-scale stairwell model
V. Bădescu	149	Observations concerning the distribution of solar diffuse radiation over Romania
P. H. Joubert and **E. H. Mathews**	155	QuickTEMP—a thermal analysis program for designers of naturally ventilated buildings
A. K. Athienitis	163	A computer method for systematic sensitivity analysis of building thermal networks
A. Kumar, S. Ashutosh and **M. S. Sodha**	169	Optimum distribution of insulation over various components of an air-conditioned building
D. W. Aubrey and **J. C. Beech**	179	The influence of moisture on building joint sealants
S. O. Ogunlana and **P. O. Olomolaiye**	191	A survey of site management practice on some selected sites in Nigeria
Announcement	197	

Vol. 24, No. 3

S. C. Kaushik and **S. Kaul**	199	Thermal comfort in buildings through a mixed water–mass thermal storage wall
M. Sandberg and **H. Stymne**	209	The constant tracer flow technique
C.-A. Roulet and **R. Compagnon**	221	Multizone tracer gas infiltration measurements—interpretation algorithms for non-isothermal cases
I. Chand, V. K. Sharma and **N. L. V. Krishak**	229	Ventilation survey of typical airy buildings—a few case studies in hot dry and hot humid zones of India
M. Segal	239	Atmospheric thermal stratification and the position of mechanical ventilation air intakes
I. A. Meir	245	Climatic sub-regions and design contextualism
A. E. Delsante	253	Steady-state heat losses from the core and perimeter regions of a slab-on-ground floor
S. Hassid	259	Thermal bridges in homogeneous walls: a simplified approach
L. Siurna, G. M. Bragg and **G. Reusing**	265	Transient solutions to a stochastic model of ventilation
P. O. Olomolaiye and **A. D. F. Price**	279	A review of construction operative motivation

Vol. 24, No. 4

E. Arens	289	Foreword: pedestrian level winds
R. M. Aynsley	291	Politics of pedestrian level urban wind control
E. Arens, D. Ballanti, C. Bennett, S. Guldman and **B. White**	297	Developing the San Francisco wind ordinance and its guidelines for compliance
F. H. Durgin	305	Proposed guidelines for pedestrian level wind studies for Boston—comparison of results from 12 studies
E. Arens and **P. Bosselmann**	315	Wind, sun and temperature—predicting the thermal comfort of people in outdoor spaces
M. Tacken	321	A comfortable wind climate for outdoor relaxation in urban areas
A. Baskaran and **T. Stathopoulos**	325	Computational evaluation of wind effects on buildings
D. Boyd and **P. Cooper**	335	Domestic kitchen extract fans: effectiveness in surface condensation prevention
M. H. Sherman	347	Uncertainty in air flow calculations using tracer gas measurements
M. H. Sherman	355	On the estimation of multizone ventilation rates from tracer gas measurements
L. Davidson	363	Ventilation by displacement in a three-dimensional room—a numerical study
